Puberty part 2

Learning objective

Students explore the physical, emotional, and social changes associated with puberty.

Take Home Messages

- There are many positives about puberty and also some challenges. Most people find sharing their thoughts and concerns with others helps them to deal with puberty in a positive way.
- Get the Facts has a completely confidential 'Ask a question' service they may wish to use. All questions are answered by a qualified health professional with a week.

• Strategies to cope with and manage the impact of changes and transitions.

International technical guidance on sexuality education

Key concept 6.3 Puberty (12-15 years)

 Puberty is a time of sexual maturation that leads to major physical, emotional, social, and cognitive changes that can be exciting as well as stressful throughout adolescence.

Materials

- Laugh and Learn video puberty part 2 (2min 19sec) (external site)
- 3 hoops (or pieces of butchers paper)
- Sticky notes or scrap paper
- Preferred media for large and small group work and individual work (e.g. paper and textas or iPads/tablets)

Before You Get Started

- Students must complete Puberty part 1 prior to this lesson.
- Protective interrupting Teachers need to know and understand how to use this technique to
 prevent students from potentially disclosing sensitive information or abuse in front of other
 students.
- <u>Dealing with disclosures</u> Teachers must be aware of school and legal procedures if a student discloses personal issues, particularly disclosures of sexual abuse.
- Question box Have a question box available in every lesson to allow students the opportunity
 to ask questions that may be too embarrassing or unsafe for them to ask openly in class. See
 Setting up the question box for further information. For ways to answer some of the curly
 questions, see Scripted answers to FAQs.
- Preview <u>Laugh and learn puberty 2</u> video (2min 19sec) to determine suitability for your students.

Learning Activities

Group agreement 5 minutes

Teaching tip: A group agreement must be established before any Relationships and Sexuality Education (RSE) program begins to ensure a safe learning environment. Read <u>Essential</u> <u>Tool: Establishing a group agreement</u> for tips on how to create one and what to include.

1. Revise or create the class group agreement.

,

Learning Activities

Laugh and learn videos - puberty part 2 5 minutes

- 2. Say: "Many of you have probably covered much of this information in primary school. This session is going to look at what you would like to have known about puberty when you first started learning about it. As with all things, there are positive and there are challenges about puberty."
- 3. Watch Laugh and learn video puberty part 2 (2min 19sec)
- 4. Ask the following questions:

What do you think of the use of humour in this video?

Does it help get the information across?

What is the message/information you took from this video?

,

Learning Activities

Puberty positivity

10 minutes

- 5. <u>Think-pair-share</u>: Discuss the positives of puberty (Puberty positivity). (Possible answers: getting older and more mature; having greater independence; body changes are interesting; able to do different things; getting taller and stronger.) Students may like to use the following resources for reference:
 - 1. Get the Facts: Puberty
 - 2. Get the Facts: Puberty animation
 - 3. <u>SECCA App</u> includes a bank of 2000 images designed to support access to RSE for people of all ages and abilities
- 6. Share ideas with whole class and discuss.

,

Learning Activities

Changes during puberty

10 minutes

- 7. Acknowledge some of the negatives that many people associate with puberty.
- 8. <u>Guess my category</u>: Place three hoops on the group (or butchers paper, or record electronically) to represent the categories 'physical', 'emotional', and 'social/relationships' but do not tell the students what they represent (i.e. do not label the categories).
- 9. Ask students to write a change associated with puberty onto sticky notes. Read each sticky note to the class and place them into the relative hoop.

10. Ask:

How have I grouped these answers? OR Why have I grouped the answers this way?

What labels would you give each group?

Do any of the groups overlap? (Hoops can then be joined to form a <u>Venn diagram</u> and sticky notes regrouped accordingly) (Emotional and social overlap in most ways. Many of the physical answers could lead to some of the emotional/social answers)

Do some groups have more sticky notes than others? Why do you think this is?

Trigger warning: Students may raise sensitive topics in this session. Teachers will need to be prepared for potential responses related to things such as <u>gender identity</u>, <u>sexual orientation</u>, religious beliefs, cultural beliefs, etc).

cultural beliefs, etc).
Possible responses
Physical
Getting first period
Waiting for first period
Period cramps
Managing periods at school or when out
Sweat/body odour
Developing breasts
Not developing breasts
Size of breasts
Voice breaking
Growing pains
Getting taller

Pimples and acne

Not getting taller

Pubic hair (growing early, growing late, growing too much, not growing enough, etc)
Making decisions about whether to remove hair or not
Weight gain Emotional
Mood swings/mood changes
Embarrassed
Anxiety
Selfishness
Become self-involved
Withdrawn
Isolated
Emotional
Fear of being judged
No one understands me
My parents don't 'get' me
Exam pressure
Negative body image (dieting, eating disorders, self-harm)
Confusion
Sexual feelings
Shy Social/relationship
Changing relationships with friends
Best friend moves to a different school
Best friend has a boyfriend/girlfriend (and no time for me)
Friend smoking/drinking/using drugs and I don't like it
I fancy my best friend
Nasty things were posted about me online
Not fitting in (i.e. not having the 'right' clothes, phone, etc)
Challenging family boundaries

Too much independence or not enough independence

I'm not allowed to date boys/girls

I have a curfew

I have to work or do chores

I'm not allowed to cut my hair, get a piercing, shave my legs, etc

Not allowed to go out without an adult

Restrictions on screen time/internet/phone use

Restrictions on clothing (e.g. Mum says I can't leave the house like this. e.g. 2 Cultural clothing)

Fancying someone and not being able to tell them

All my best friends have boyfriends/girlfriends. I don't.

Crushes

Dealing with rejection

Navigating new relationships

Breaking up

Questioning sexual identity (e.g. Am I gay?)

I sent a naked pic

A private image I sent got shared without consent

Learning Activities

Positive coping strategies 20 minutes

- 11. Say: "It is important for people to have a range of positive coping strategies to help with the potential challenges of puberty. No one person will feel exactly the same as others and no one strategy will work for everyone, so lots of different ideas are needed. Lots of skills that you already have can be used to think about how you can deal with these potential challenges seeking help, problem solving, and communication. We are going to come up with lots of ways that you or someone you know might find useful."
- 12. In pairs, students to be given one challenge of puberty. Use the <u>mindmap</u> strategy to brainstorm some ways of dealing positively with the challenge allocated. (PC options: Word SmartArt Tools; <u>Canva Education Mindmap</u>; <u>Xmind</u>; <u>Bubble.us</u>. Table app: <u>Popplet</u>). Model an example and have students offer some positive coping strategies.
- 13. Other possible copings strategies:
 - 1. Talking to a teacher/school nurse/school psychologist/chaplain/doctor
 - 2. Getting enough sleep
 - 3. Turning off phones/devices and going outside
 - 4. Using Kids Helpline
 - 5. Meditation/Yoga

- 6. Remembering that puberty doesn't last forever you will get though it!
- 7. Getting questions answered on Get the Facts website
- 14. Share and display the mindmaps.

3-2-1 Reflection

Reflection: What I wish I had know about puberty BEFORE puberty! 5 minutes

- 15. Using preferred medium, students complete the following sentence: 'Puberty! I wish I had known that....because...' Examples: Puberty! I wish I had known that I could talk to Headspace when I was feeling low because I didn't realise there were so many organisations like Headspace that offer help for free. Puberty! I wish I known that I didn't need to worry about hair growing in weird places because now I think it's cool. Trigger warning Some students may disclose personal information when using 'I' statements. Some students may find this 'I' statement too personal or confronting. Consider if this following alternate wording is better for your students or offer them the choice. 'Puberty! One thing I would tell someone that is about to start going through puberty is....because...'
- 16. Share in small groups.
- 17. Discuss the following in small groups or record in a journal. How easy was it to think of the positives of puberty? Why? Why does puberty have so much misinformation around it? What are two coping strategies that appeal to you and why do you like them? What's one positive thing about puberty that you would say to a younger person?

3-2-1 Reflection

Assessment task

SCSA Assessment task <u>How to cope with puberty</u>.

Health Promoting Schools

Background teacher note: <u>Health promoting schools framework</u>.

Partnerships with parents

- <u>Talk Soon. Talk Often: a guide for parents talking to their kids about sex</u> is a free resource that
 can be bulk ordered by schools and an <u>interactive website</u>. Send a copy home to parents prior
 to starting your RSE program. The booklet offers ages and stage related information on puberty
 (and other topics) so that parents can reinforce the topics covered in class. (<u>How to order hard
 copies.</u>)
- Order copies of Puberty and Relationships, sex and other stuff to be sent home for parents.
- Run a parent workshop prior to delivering RSE lessons so that parents can see the resources used, ask questions and find out how to support the school program by continuing conversations at home.
- Add the Get the Facts link to your website or e-news.
- The <u>SECCA app</u> is a free resource that includes a bank of 2000 images designed to support access to RSE for people of all ages and abilities. Share the link in your newsletters.

Partnerships with school staff

• Invite the school health professionals and pastoral care staff (school nurse, school psychologist,

chaplain, boarding house master, etc) to a class or an assembly to introduce them to the students. Have them talk to the students about their role and how they can help. For example:

- If you get your period at school and need help, you can go to...
- If you are worried about something and need to talk, you can go to...

Pregnancy and birth

Learning objective

Through research, students develop an understanding of the physical, emotional and social changes that occur as a result of pregnancy and birth. Students create a poster or movie to demonstrate their understanding.

Take Home Messages

- Sexual activity can result in conception, pregnancy and the birth of a baby.
- · Conception occurs when a sperm fertilises an ovum.
- Healthy and unhealthy behaviours can affect the growth of an unborn baby.
- Conception, pregnancy and birth require a level of social and emotional readiness for all people involved.

Materials

- Items to represent the size of a foetus as it develops salt, pea, kidney bean, lime, avocado, rock melon, 30cm ruler, pillow (approx. 55cm for last trimester)
- Teaching Resource: Stages of pregnancy
- Teaching Resource: Pregnancy card sort [one set per group]

Before You Get Started

- Note: Revise the learning activities Reproductive systems (Year 5).
- It is important that the social and emotional readiness of pregnancy and birth is discussed throughout this activity. Students require the understanding that being pregnant and having a baby is a major life transition and can impact significantly on a person's existing lifestyle (physically, socially and emotionally).
- This activity is concerned with conception through sexual intercourse but it's important to inform students that there are families where other methods such as in-vitro fertilisation (IVF) are better and more appropriate. It is also important to recognise that there are families where the young person is adopted or fostered and/or where the parents are of the same sex.
- The topic of pregnancy and birth may be an exciting and interesting topic for some, but be
 mindful that some students may feel embarrassed, uncomfortable or worried about how their
 bodies may change. Increase the comfort of students through introducing this topic with
 excitement and fun. Providing popcorn (or something similar) for students to share can reduce
 their anxiety levels.
- Students may have questions that they feel uncomfortable to ask. Providing a <u>question box</u> for students to place their questions in anonymously will ensure their questions are answered in a safe environment.
- The WA Department of Health has developed a free resource for parents: <u>Talk Soon. Talk Often. A Guide for Parents Talking to their Kids About Sex</u>. It is recommended that teachers communicate to parents and explain the topics that will be covered such as healthy relationships, puberty, hygiene, emotions, resilience, etc. and that you are not teaching their child to have 'sex'.
- Puberty kits: The use of a puberty kit can be a useful tool in the classroom. Check with your

school's public health nurse to see if there are any kits readily available or that can be made up to use.

- If you are using an educational video, students can often be distracted if the videos are obviously out of date, as evidenced by the clothes, hairstyles and quality of the video, although this could be used to add humour to the experience. Ensure that any multimedia used is current, relevant, appropriate and sufficient time is allocated for a discussion afterwards.
- Many teachers ask the question of whether or not they should separate the boys and the girls for such classes. Research shows that there is no significant difference for either strategy. You may choose to separate your class by gender, keep them all together or mix strategies by separating your class for certain activities. If you do choose to separate the sexes, ensure that both groups receive the same information. It is just as important for students to learn about their changing bodies as it is for them to learn what the other sex is going through in order to promote compassion. Remember when making this decision that all students need to overcome any potential discomfort in order to be able to effectively communicate sexual matters in relationships when they are older.
- Consider providing students with a copy of the <u>Puberty booklet</u> and <u>Relationships</u>, <u>Sex and</u>
 <u>Other Stuff</u> to take home and read.
- Refer to the Guide: <u>Pregnancy and young people</u> for further content information related to this activity.

Learning Activities

Pregnancy knowledge pulse check

- 1. Using the <u>KWL</u> template, ask students to complete the first two columns on their own: What they Know and what they Want to know about pregnancy and birth.
- 2. Show students the items that represent the size of the foetus as it develops (listed in materials) without explaining the reason why you are showing them.
 - Ask students to suggest reasons that the objects have been shown.
 - Show students the Teaching Resource: Stages of pregnancy (projected on a screen and/or handouts).
 - Go through each image and relate each stage back to a relevant object (e.g. at 4 weeks
 a foetus is the size of a grain of salt). Emphasise that even though the foetus is small,
 vital changes are happening. The foetus is vulnerable to alcohol and other drugs even
 during the first weeks.
- 3. In pairs or small groups, students sort Teaching Resource: Pregnancy card sort into 2 groups:
 - 1. Increases chances of having a healthy baby; and
 - 2. Decreases chances of having a healthy baby.
- 4. When complete, clarify any misunderstandings (e.g. What is folate? Why should some raw foods be avoided?)

Learning Activities

Pregnancy poster

- 1. Students research the social and emotional impact of being pregnant and having a baby, e.g. may have to give up study/work, loneliness while caring for the baby at home, feeling worried about looking after a baby. Ensure the students have a clear understanding of the concepts social and emotional first.
- 2. Students create a poster, PowerPoint or iMovie that highlights the social and emotional impacts of being pregnant and giving birth to a baby. The project could be titled 'Strengths, skills and support I would need to be a parent'.

3-2-1 Reflection

- 1. Students present their poster, PowerPoint or iMovie to the rest of the class.
- 2. Students complete the 'what I have Learnt' component of their KWL chart.
- 3. Highlight that being pregnant and having a baby is a lifelong commitment and requires a lifestyle change for all people involved.
