RELATE has been designed to improve students' knowledge, attitudes, skills and behaviours to recognise and engage in respectful relationships. This includes increased:

- awareness of, and respect for, diversity
- understanding of the impact of gender expectations and social norms on relationships and sexual health
- understanding of, and skills for, ethical behaviour in the context of relationships
- skills to establish and maintain positive, equitable and respectful relationships
- capacity to identify and address disrespectful behaviour
- digital literacy skills
- critical analysis skills
- knowledge of, and ability to access, a range of support people and services.

It provides opportunities for young people to explore attitudes and peer, gender, social and cultural influences that impact on behaviour in relationships; identify perceived and actual peer norms and rectify incorrect perceptions; examine their expectations and the value they place on different behaviours within relationships as well as develop skills and confidence to carry out desired behaviours (self-efficacy).

Gender analysis is core to the approach of the *RELATE* program. Gender inequality and gendered expectations in relationships are understood as key issues underpinning the occurrence of relationship violence and poor sexual health outcomes. Gender is explored by considering individuals within the context of relationships, communities and society. This is extended using a human rights framework, that considers not only gender but includes race, ethnicity, class, sexual orientation, disability, religion and culture.

RELATE Stage 2 covers all of the *Personal, social and community health* descriptors in the Year 8 and Year 9 Health and Physical Education Syllabus. See *RELATE 2 WA Curriculum Mapping (63KB)* for descriptors mapped to individual session plans.
