

Curriculum links

WA HPE Curriculum

Sub-strand: Personal, social and community health

- Body parts, visible and private and where they are located.

International technical guidance on sexuality education

Key concept 1.3: Tolerance, inclusion and respect

- Every human being is unique, can contribute to society and has a right to be respected.

Key concept 6.1: Sexual and reproductive anatomy and physiology

- Everyone has a unique body that deserves respect, including people with disabilities.

Key concept 6.4: Body image

- All bodies are special and unique and people should feel good about their bodies.

Materials

- Images of people with different body types and physical features, e.g. [Everyone's Got a Bottom](#) picture book (page 24 - picture of family).
- Craft supplies (glue, scissors, wool, coloured paper/card).
- Student activity sheet: [Child body outlines](#).

Before you get started

- It is recommended and age appropriate that students at this level learn the correct names of their external body parts, including sexual parts, e.g. penis, vulva, breast, testicles and buttocks (or bottom). Knowing these names enables children to communicate clearly if they need to get help; and in particular, in cases of abuse or injury. For more information see the FAQ: [How early should you introduce the names of body parts?](#)
- Read Educator note: [Protective behaviours education](#) so teachers are aware of the concepts of protective behaviours education.
- [Protective interrupting](#) - All staff in the room need to know and understand how to use this technique to prevent students from potentially disclosing sensitive information or abuse in front of other students.

- [Managing disclosures](#) - All staff in the room must be aware of the school and legal procedures if a student discloses personal issues, particularly disclosures of sexual abuse.

Learning activities

Group agreement

5 mins

Teaching tip: A group agreement must be established before any Relationships and Sexuality Education (RSE) program begins to ensure a safe learning environment. Read: [Essential tools: Establishing a group agreement](#) for tips on how to create one and what to include.

1. Revise or create the class [group agreement](#).

Picture Talk

10 min

1. Show children the images on page 24 of [Everyone's Got a Bottom](#). (NB: The shared reading of the book is part of Pre-primary Learning activity: [Private vs public bodies](#)).
2. Invite suggestions from students for adjectives that can be used to describe different physical features. For example:

This is Ben. What colour is Ben's hair?

(black)

This is Ben's little sister, Emma. How is Ben's hair different from his sister's hair?

(brown)

This is Ben's little brother, Jack. What do you notice about Ben's brother's hair? Why do you think it is different?

(light brown and curly, like his dad's, could be step-brother or half brother, could be foster child or adopted)

In order from tallest to smallest, name the characters. Why is Ben the tallest?

(Emma, Jack, Ben. Ben is the oldest)

Are the oldest people always the tallest?

(no, people can be shorter than people that are older than them. People are all different heights)

Body outlines

20 min

Independent or Small Group

3. Provide each student with an A3 copy of the [Student activity sheet: Child body outlines](#).
4. Ask students to share their thoughts about the body outlines:

Do you think this body outline is a boy or girl? Why?

(Students may give a range of ideas encourage them to justify their response. E.g. Boy - looks like it has short hair. Do all boys have short hair?)

How is this body outline the same as your body?

(legs, arms, fingers, head, etc)

How is it different?

(I am shorter/taller, I have long hair, I have eyes/nose/other features not identifiable on the outline)

What parts of our bodies are quite similar to other people?

(arms, legs, brain, lungs, heart, toes, etc)

What parts of our bodies can be very different to other people?

(hair - colour, curls/straight, eye colour, height, penis/vulva)

Teaching tip: This provides a good opportunity to talk about body diversity. Some people are not born with some body parts, some people may have had injuries that mean their bodies look/work differently. Use this as a safe space to discuss and embrace these differences whilst also showing similarities. E.g. Our bodies allow us to live, breath, learn, love.

Teaching tip: Private body parts may come up naturally in these conversations. That is OK. Help students to refer to the body parts using the correct terminology and address them in the same way that you do any other body part. Private body parts are covered specifically in the [Learning activity: Public vs private body parts](#).

5. Students use their craft supplies to make their body outlines look different by adding different hair, colouring the skin different colours, etc. Ask students to give each of the body outlines a name.
6. Have students share their work using the [think-pair-share](#) teaching strategy to verbally describe the differences they have illustrated (focusing on the variations, e.g. short hair, long hair, curly hair, straight hair, dark hair, blue eyes, brown eyes, etc).

3-2-1 Reflection

Treating others with respect

10 min

7. Write the word 'similar/same' and 'different' on the board.
8. Ask students to share one thing that is similar and one thing that is different that they have shown on the body outlines. For example, "They both have blue eyes but Raj is right-handed and Jasmine is left-handed".
9. Point to the words 'similar' and 'different' as the students describe the features.
10. Ask:

How would someone feel if they were treated badly because of a difference they had?

(Bad, sad, angry, lonely, not nice, hurt)

How would do you think they should be treated instead?

(Like everyone else, kindness, invited)

11. Say:

"We are so lucky to live in a world that has so many different, unique and special people. Just because someone looks different or likes different things does not mean someone is bad. Treating them badly because they look different or act differently to us is bully. Bullying is never okay. We can all make the world a better place by accepting people for their differences. Everyone deserves to be treated nicely."

Health promoting schools

Background teacher note: Health promoting schools framework.

Environment

Policy

- There are clear anti-bullying policies which names discrimination or bullying based on differences or diversity (eg culture, race, religion, gender) is a form of bullying and there will be actions as a result of that kind of bullying.

Education

Professional development

- Teachers have received training on protective behaviours education.

Partnerships

Family

- [Talk Soon. Talk Often: a guide for parents talking to their kids about sex](#) is a free hardcopy resource that can be bulk ordered by schools and [website](#). Send a copy home to parents prior to starting your RSE program. The booklet offers ages and stage related information on puberty (and other topics) so that parents can reinforce the topics covered in class. ([How to order hard copies.](#)) Provide the link to parents on school websites and social media.
- Run a parent workshop and run this activity with parents to model the content that will be covered in your RSE program.
- Run a parent and child evening session, where the children can teach the parents what they have been learning about.
